# Building a future for our digital memory, **together**

**NCDD**

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

# Netherlands Coalition for Digital Preservation

A low-angle photograph of a wooden utility pole with multiple cross-arms and a dense network of black cables against a clear blue sky. The pole is made of weathered wood and has several horizontal cross-arms. A large bundle of black cables is coiled around one of the lower cross-arms. The background is a solid, clear blue sky.

To establish an organisational and technical infrastructure for long-term access to all digital objects which are of crucial importance for science, culture and society

# Why ?

- The overall purpose why to foster cooperation is to increase both **Effectiveness** and **Efficiency**:
  - the ultimate goal is to enable all digital archiving organisations in The Netherlands to make and keep their digital objects accessible (effectiveness ),
  - and to do this at costs that are as low as possible. This can be achieved by cooperating; economies of scale (efficiency).
- The assumption is that the more is cooperated, the bigger the delta is in increased Effectiveness and Efficiency.
- It is important to make a distinction between *administrative* responsibilities and *operational* responsibilities (that can be outsourced).
- The starting point for NCDD is: *share what is possible, keep separate what must be separate.*

# Netherlands Coalition for Digital Preservation

Established in 2008

Cross-domain national coalition covering the entire public sector

## 5 Members, representing a domain:

- The National Archive (NA)
- The National Library of The Netherlands (KB)
- Data Archiving and Networked Services (DANS)
- Dutch Institute for Sound and Vision (Beeld & Geluid)
- The Netherlands Cultural Heritage Coalition for Digital Preservation (CCDD)

# The NCDD is

**NCDD**

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

## Platform

- Advocacy
- Knowledge exchange
- Knowledge development
- Education & training

## Infrastructure

- Project coördinator
- National infrastructure
- Building Blocks

## Bridge

- International developments

- Europe

## Critical think tank

- Policy making

# What do we have?

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

Institution digitizes or  
has digital collection (n = 141)

*(European average: 87%)*

Institution collects  
born digital heritage (n = 98)

*(European average: 53%)*

# What do we have not (yet)?

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

Is there a policy for digital preservation /  
long term access?  
(n = 101)

*(European average: 26%)*

Involved in an infrastructure for  
digital preservation?  
(n = 96)

*(European average: 30%)*

# National policy

## Towards a national approach:

- Connect existing infrastructures
- Responsibilities and roles for large knowledge institutions
- Three layer model:
  - Users, references, data (i.e. “visible”, “usable”, “preservable”)
- Roadmap: policy driven
- Cross-domain collaborative programme

## Preservable:

- Building a national infrastructure through cross-domain collaboration
- Collaboration = more effective and more efficient
- Three theme’s:
  - Scalability of the archives and infrastructure
  - Cost effectiveness
  - Roles and responsibilities in collection development

# Building blocks in projects

NCDD

# Goals of the research

(start April – finish December 2014)

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

1. Update of the picture of the “AS IS” situation of the present infrastructure for digital preservation (DPI) across the 5 domains
2. Present costs incurred by the domains for DPI
3. Estimate of growth (volume, complexity, diversity)
4. Description of the “TO BE” situation of the infrastructure for DP
5. A “FIT – GAP” analysis
6. Scenario’s for transition from “AS IS” to “TO BE”
7. Estimate of required DPI budgets (next 5 years, 5 years after)
8. “Prediction model” for estimating growth (volume and €)
9. Definition of next phase, amongst which the development & implementation of a (national ?) cost model....

# State of affairs, done

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

- Started early April 2014
- Desk research (400+ articles, books, websites)
- Developed the analytical framework
- Conducted 10 interviews with organisations
- 15+ interviews with experts, stakeholders (OCW !)
- Processed results
- Developed scenarios
- Developed diagrams
- Concept Table of Contents for Final Report

# State of affairs, to be done

- Finalise interviews:
  - Nationaal Museum van Wereldculturen
  - the CIO of the ministry of Education, Culture and Science (OCW)
  - vendors
- Expand the results of the research
- Elaborate on scenarios (18 attributes, e.g. Transition scenarios)
- Look into the feasibility of the financial project goals within this project (present, future, “predictability model”)
- Verification & validation of results (NCDD members, interviewees, stakeholders, OCW)
  
- Finalise the Report

# Scenarios, goal

- The overall purpose why to foster cooperation is to increase both **Effectiveness** and **Efficiency**:
  - the ultimate goal is to enable all digital archiving organisations in The Netherlands to make and keep their digital objects accessible (effectiveness ),
  - and to do this at costs that are as low as possible. This can be achieved by cooperating; economies of scale (efficiency).
- The assumption is that the more is cooperated, the bigger the delta is in increased Effectiveness and Efficiency.
- It is important to make a distinction between *administrative* responsibilities and *operational* responsibilities (that can be outsourced).
- The starting point for NCDD is: *share what is possible, keep separate what must be separate.*

# Scenarios

**NCDD**

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

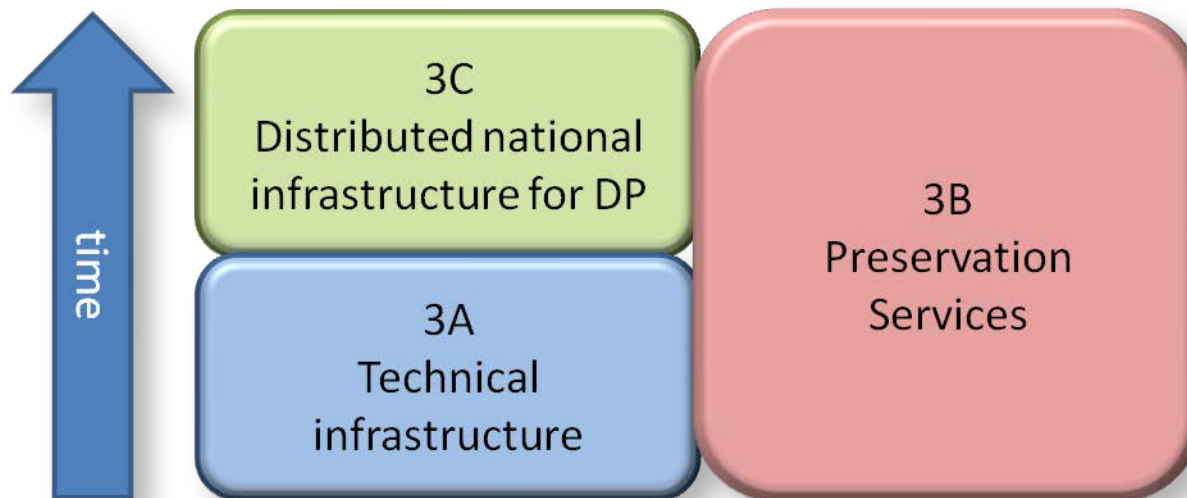

SCENARIO	
1	Doing nothing extra
2	Ad Hoc (extend present practice)
3	Shared Services
3 A	Technical infrastructure
3 B	Digital Preservation Services
3 C	Distributed National Infrastructure Digital Preservation
4	One NL e-Depot

# Scenario 3, elements & time

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

- Technical infrastructure (3A) and Preservation Services (3B) run parallel
- Technical infrastructure (3A) is conditional for the Distributed national infrastructure (3C)
- First steps for 3A are already in progress: Rijksdata centres (all governmental data are to be stored in 4 data centres)

# Scenarios, quick & dirty scan

based on “gut feeling”

**NCDD**

NCDD

NATIONALE  
COALITIE  
DIGITALE  
DUURZAAMHEID

- Information Management Policy “Culture” by the Ministry of OCW input from NCDD seems required
- Based on this, develop the Mission & Vision for a Dutch National Digital Preservation Infrastructure (in line with the National Strategy)
- Develop a Collaborative Strategy
- Formulate long term Aims (20 – 30 years)
- Make the extended Business Case: e.g. elaborate on scenarios, expand on details, analysis of benefits, maturity analysis, cost – benefit calculations
- Formulate Governance
- Investigate, in a standardised way, the Requirements of all types of institutions and organisations involved (“Greatest Common Divisor” vs “Least Common Multiple”; it is the latter we need...)
- Define Goals (5 – 10 years)
- Define Objectives & Action Plan (horizon 1-2 years)
- Develop a Programme, start projects in line with National Strategy
